Your Doctor & Your Prescription

In 2004, a Federal Law called the "Fairness To Contact Lens Consumers" Act went into effect. This law mandates that patients be given their prescription as soon as they've been fitted. The law requires sellers to verify prescriptions and gives prescribers a reasonable amount of time, 8 business hours, to respond. It also established that a contact lens prescription will expire within one year or at the time set by State law, whichever is greater.

Frequently Asked Questions

Is a contact lens prescription different than an eyeglass prescription?

Yes. When you order contact lenses, you must have a current contact lens prescription which specifies the power of the lenses, the size of the lens, the type and brand of lens.

If my 2 week disposable lenses are still comfortable and in good condition beyond 2 weeks, can I continue to wear the same pair?

In order to maintain optimal eye health and comfort, it is important to adhere to the wearing schedule prescribed by your doctor. The main advantage of wearing disposable lenses is that you are putting a fresh new pair of lenses in your eyes every 2 weeks. Also, the convenient cleaning regimen of a disposable lens is only adequate for a 2 week wearing schedule. The 2 weeks refers to the actual amount of wearing time so they can last longer than 2 weeks if you are not wearing them full time.

What's the difference between rigid gas permeable (RGP) lenses and soft lenses?

RGPs are smaller and made out of a harder, less pliable material than soft lenses. RGPs correct astigmatism whereas soft spherical lenses do not.

Do I still need a prescription if I just want contacts to change my eye color?

Yes, you still need to be fitted for the lenses even if you don't need vision correction. This is because contact lenses are medical devices and wearing them can affect the health of your eyes.

My lens type is not on the list of available lenses; can I still purchase them from Contact Fill?

Your lens might be a special order product available through Contact Fill. Just call or email with your lens prescription information and questions. A Customer Service Specialist will be glad to assist.

Can Contact Fill call my doctor to get my prescription?

Yes, we will be glad to call your doctor's office to verify your prescription.

When I order my contact lenses from Contact Fill, will I still be able to obtain manufacturers rebate coupons?

Contact Fill sends with all orders, rebate information that may be applicable to the brands of contact lenses ordered. Contact lens prices advertised by Contact Fill reflect the cost before rebates, if available.

What is the cost to ship my order?

The standard cost for shipping your contact lenses from Contact Fill is \$6.95 per order. However, first-time buyers will receive free standard shipping on orders placed by June 30, 2014. Use the promotion code [SHIP13](#) to receive this special offer.

Does Contact Fill accept insurance?

Contact Fill accepts National Vision Administrators (NVA) plans for payment or member reimbursement. For all other insurance purposes, an invoice is provided with every order. If you require a more specialized invoice to submit to your insurance carrier, please ask a Customer Service Specialist for assistance.
